

ChemLINE[®] High Performance Coatings for Lining Storage Tanks

- ChemLine[®] patented polymer coatings protect storage tanks against corrosion from aggressive acids, alkalis, solvents, CPPs, and edible oils.
- ChemLine[®] resists chemicals from pH 1 to pH 14 and at elevated temperatures.
- ChemLine[®] polymer coatings are high solids with low VOCs, making them the preferred lining system for bulk chemical storage tanks.
- ChemLine[®] provides greater flexibility as one universal tank lining.
