

# ChemLINE<sup>®</sup>

## High Performance Tank Linings that Resist Corrosion from More Than 5,000 Chemicals

**ChemLine<sup>®</sup> patented polymer coatings protect storage tanks** against corrosion from aggressive acids, alkalis, solvents, CPPs, and edible oils. ChemLine<sup>®</sup> resists chemicals from pH 1 to pH 14 and at elevated temperatures.

ChemLine<sup>®</sup> polymer coatings are 97% to 100% solids with extremely low VOCs, making them the preferred lining system for bulk chemical storage tanks. As one universal lining, ChemLine<sup>®</sup> provides greater flexibility in the range of chemicals handled, saving you thousands of dollars and adding value to your asset.
