

TWO IN A SERIES on operating chemical tankers more profitably

▶ 2

Trust MarineLINE®

Application & Curing Ensured by Certified Inspectors

▶ You've made the right decision to choose MarineLine®, the leading cargo tank coating system, capable of carrying the complete range of IBC-approved cargoes.

With proper surface preparation, application, heat curing and final inspection, your tanks will provide years of service.

We employ our own experienced team of MarineLine inspectors, operating at shipyards throughout the world, to review, test, and approve every phase in the coating project — ensuring a thorough surface preparation, smooth and consistent applications, and controlled heat curing to complete the process.

Only after stringent and exacting final tests is the MarineLine coating certified and warranted, ready for immediate service of your profitable cargoes!

The MarineLine® coating system is in use on hundreds of chemical vessels throughout the world, safely carrying acids, alkalis, solvents, edible oils and many other liquid cargoes.
