

**ChemLINE<sup>®</sup> 784**

# **Chemical Resistance Guide**

**Advanced Polymer Coatings**

**Avon, Ohio 44011 U.S.A.**

**Phone: {+01} 440 937-6218**

**Fax: {+01} 440 937-5046**

*Revision January 30, 2013*

# **Protective Lining for Superior Corrosion Resistance with Exceptional Toughness**

## **Resists:**

- *Acids, Alkalis, Solvents, Oxidizing Agents*
- *Thermal Shock; -40°F (-40°C) to 300°F (150°C)*
- *Flex Stressing*
- *Wear and Abrasion*
- *Impact*
- *Under Creep Corrosion*

## **Data Interpretation:**

<b>A</b>	<b>=</b>	<b>Good at Ambient Temperature (Or up to temperature listed {°C})</b>
<b>N</b>	<b>=</b>	<b>Not Recommended</b>
<b>-</b>	<b>=</b>	<b>Not Tested</b>

## **Notes:**

- (A) *Certain chemicals may cause surface discoloration;*
- *Sulfuric acid may darken coating*
  - *10% Nitric may turn coating green*

*These are surface effects only, no absorption  
Approximate original color may be regained by neutralization.*

- (B) *After carrying Methanol – DO NOT STEAM  
Force Air Dry for 24 hours.*

*Before carrying Methanol – if tanks have been steam cleaned  
prior to carriage of methanol, tanks must be allowed to cool to  
30-40°C before loading.*

- (C) *If the coated tanks are to be steamed as part of the tank  
cleaning process, then the ambient temperature in the tank is not to  
exceed 140°F (60°C) during steaming.*
